PRONOUNCING VOCABULARY

OF

GEOGRAPHICAL AND PERSONAL NAMES.

THE GEOGRAPHICAL LIST

EMBRACES ALL THE NAMES WORTHY OF NOTE IN THE KNOWN WORLD, ACCOMPANIED WITH SUCH DESCRIPTIVE AND STATISTICAL FACTS AS ARE USUAL IN GAZETTEERS.

THE PERSONAL NAMES

COMPRISE THOSE OF THE MOST CELEBRATED MEN OF ANCIENT AND MODERN TIMES, DOWN TO THE PRESENT DAY, WHICH ARE LIKELY TO BE MET WITH IN GENERAL READING; APPENDED TO EACH NAME ARE SUCH BIOGRAPHICAL FACTS, AS ARE NECESSARY IN A BOOK OF REFERENCE.

TO WHICH IS ADDED

A COMPLETE LIST OF SCRIPTURAL NAMES.

CONCLUDING WITH TABLES

WHICH SHOW AT A GLANCE THE POPULATION OF THE SEVERAL STATES, THE TIME OF THEIR ELECTIONS, THE MEETING OF THEIR LEGISLATURES, THE SUCCESSION OF THE PRESIDENTS, AND A LIST OF ALL THE COLLEGES AND PROFESSIONAL SCHOOLS IN THE UNITED STATES.

BY ELIAS LONGLEY.

Entered according to Act of Congress, in the year 1857, by
LONGLEY BROTHERS,
 In the Clerk's Office of the District Court, for the Southern District of Ohio.

INTRODUCTION.

PECULIAR FEATURES OF THE WORK.

A WANT has long been felt, in every community, for a cheap Vocabulary of Geographical and Personal Names, as a book of reference for pronunciation, mainly, but secondarily as a brief guide to the leading items of information connected with those names. This want has been experienced, perhaps often unconsciously, by pupils in our common schools, by the poorer portion of students in high schools and colleges, and by the mass of newspaper readers who invest very little money in books. The thorough student, and the general reader who has plenty of means with which to supply every convenience, can obtain the information desired in such works as "*Lippincott's Gazetteer*," "*Appleton's Biographical Encyclopedia*," etc.; but they are too expensive for the classes mentioned, and in many cases too voluminous to be convenient.

In regard to personal names, so far as the publishers are aware, there has never before been an attempt made to give their pronunciation in an extended list. [For remarks on the importance of calling men by their right names, see pages 128—9.]

But there is another feature of the work here presented, which, in the minds of the publishers and of the many school teachers and friends of education who have examined the subject, is of more value than either of the considerations above mentioned, and demands more than a passing notice. The methods of representing pronunciation in the ordinary dictionaries and gazetteers, either by marked letters or by figures in connection with them, is so imperfect and unsatisfactory as to be a constant source of annoyance to all who are necessitated to use them. That the reader may understand the full merits of the system of notation employed in this book, we propose to notice briefly some of the circumstances that call for its introduction.

The first principle of alphabetic writing or printing was the representation of each sound by a simple *character* or *letter*, so that these letters or *elemental parts*, when combined, would be the counterpart of the spoken word—a picture of the word itself. Such was the Sanscrit, and such, it is evident to every intelligent mind, should be the principle of *all* alphabetic writing, for thus the acquisition of written or printed language would be as easy as that of

spoken, and there would be no necessity for Pronouncing Dictionaries and Gazetteers, while a disregard of this principle renders the represented language, if not hieroglyphical, at least ideographic; that is, the written or printed word represents an idea, and can not, as a general thing, be considered as representing the sounds of a spoken word. For example, take the word *cough*, and what relation does either of the letters bear to the three sounds heard, as indicated by the Pronouncing Dictionary, *kof*? *C* can not definitely represent *k*, because in *cent* it is supposed to stand for *s*, in *suffice* for *z*, in *vicious* for *sh*, etc.; and how can *o* be a representative of the vowel sound in *cough*, when it has such different sounds in *no*, *son*, *woman*, *women*, etc.; and *u* is not any better a representative of this sound, and the two uncertainties together can not make the matter more clear, especially when we see them called so differently in *count*, *cousin*, *pour*, *tour*; while *g* is a poor representative of *f*, and *h* is no better, and the two together are no improvement, when we view their varying sounds in *lough*, *ghost*, and want of sound in *dough* and *weigh*. Any other word, almost, would answer just as well to show the utter deficiency of English orthography to represent the spoken words of the language. There are only 60 words, in the 90,000 used by English speakers, whose spellings are in accordance with the true principle of alphabetic writing.*

Primarily, then, an insurmountable difficulty in the way of accurately representing by means of the Roman alphabet any words whatever, is, in its consisting of but *twenty-three* representative letters, while the spoken language consists of upwards of *forty* distinct sounds! And secondarily, even were there a uniformity in the notation used by the different authorities in supplying the deficiency caused by employing the Romanic semi-alphabet, it is still open to the charge of complexity and inaccuracy, and therefore unfit to be used in teaching children a correct pronunciation.

There are other serious objections to our present orthography as it regards teaching a correct pronunciation, only one of which we shall mention in this connection, and which has a bearing on the remarks above. It is that it gives rise to a slipshod manner of pronunciation or *enunciation*. Who that has paid the least attention to the pronunciation of the middle and upper classes, as well as that of public speakers, has not noticed the great want of care, the inaccuracies and diversities prevalent, and particularly how utterly regardless of all rules and taste they are in the enunciation of unaccented syllables? The words fall from their lips robbed of all their beauty and interest—shapeless and repulsive to the educated ear. The fault with the better educated class of people is chargeable, to a great extent, to themselves, but with those less fortunate there can be no such plea, and the present English or Johnsonian orthography, absurd as it is in structure, becomes responsible here. Good pronunciation is in giving the *whole* word, with all its parts perfect; *every unaccented syllable should be enunciated clearly and distinctly—not with emphasis but with distinctness*. Speakers who are thus accurate are seldom found, notwithstanding there are such, and it is probable that when phonology

*For further illustrations of this subject, see "Plea for Phonetic Spelling."

shall have been generally taught the number will be increased; nay, more, good speech will come to be "a common heritage."

A word further in reference to elemental speech. "It is rare," says Mr. A. J. Ellis, whose authority is unquestioned on this subject, "to meet with a single elemental work which contains even a tolerably correct account of this important subject, and even scholars and professed teachers of pronunciation and elocution are generally very ignorant of the latter. Nay, more, the very teachers and best investigators of the subject are at variance. Let any one peruse the works of the greatest authorities we possess, those of Amman, Johannes Müller, Willis, Wheatstone, Lepsius, Max. Müller, Latham, etc., and he will see differences on fundamental points which are irreconcilable. If he turn to works of minor pretence, as Bell, Smart, Walker, Worcester, and the numerous works on elocution, he will find confusion partly arising from ignorance, and partly from a partial view of the subject. While in common grammars, and in the common treatises of travelers, and Pronouncing Vocabularies and Dictionaries, he will find that one person has copied from another without understanding him, till words are repeated and sense entirely lost."* So long as we have for guides the clumsy system of notation of Webster, the "obscure" vowel sounds of Worcester, and the common imperfect works on phonology, we may expect no better results. The remedy clearly is the *general introduction, into all our primary schools, of works based upon a strictly phonetic principle*, and in time there will be a total revolution and a harmony in pronunciation.

By the application, then, of the phonetic principle, that every distinct element in speech shall have its distinct symbolic exponent, to the representation of the pronunciation of geographical words, we have a work that at once combines the three things desirable, *simplicity, accuracy, and reliability*.

It may be urged in opposition, that the introduction of this without being accompanied or preceded by primary works will prove inexpedient, and, eventually, a failure. We reply that if this were the first work of the kind offered to the public there might be some ground for apprehension, but *phonotypy is a fixed fact*; and its promulgation for several years past, and its introduction into primary schools in different parts of the country as a means of teaching to read romanically, in the common print, and the generally increasing demand for teachers qualified to teach it, have wrought a complete change in our system of primary instruction, and stamp phonetics as an indispensable adjunct in teaching to read, and the knowledge of it a prerequisite to a qualified teacher. When, previous to the introduction of phonetics, did we hear of the first principles of language, the elemental sounds, being taught in schools? Or where were the teachers who were well acquainted with them? Even now, in many sections of the West and South, instructors as well as pupils are greatly deficient in this respect; but the light of the phonetic principle is opening their eyes; and whether it reach them directly through the phonotypic alphabet or by means of Charts of the Elementary sounds, newly arranged spelling books and readers, or some other channel, it matters not, they will soon all be

* Introduction to Phonetic Dictionary, p. xxiv.

theoretical phoneticians, and will not object to a philosophical alphabet for the representation of pronunciation in Dictionaries, Vocabularies, etc., if for no other purpose.

In regard to the availability of the Phonetic alphabet for teaching children to read the common spelling in shorter time and in a better manner, than by the ordinary method, the reader is referred to the Primer and Readers advertized at the close of this work, or for the philosophy of the fact, to the Introduction to the Phonetic Dictionary, by the same publishers.

The phonetic alphabet will be found on page 12, facing the first page of the Vocabulary, where, by examining the *key words* the sounds of the new letters will be readily learned, the old letters having the sounds they usually represent in the old spelling, which are also designated.

PRONUNCIATION OF FOREIGN NAMES.

In accordance with the established custom of the best Geographers, we have given the pronunciation of the names of cities, towns, rivers, etc., as nearly as English mouths can speak them, as they are pronounced by the best educated people of the countries in which they are situated. To do this it has frequently been necessary to give two pronunciations, as the same printed word is often spoken differently in different countries; as, LIMA, *Lé-mq*, a province in Peru, but *Lj-ma*, towns in the United States; PARIS, *Pq-ré*, a city in France, but *Pár-is*, towns in this country.

In carrying out this plan we have been compelled to represent a few sounds not provided for in the English Phonetic Alphabet, because not heard in the English language. The most frequent is that of the German and Scotch *ch* and Germau *g* at the end of a syllable, which represent the same sound, namely, a strongly aspirated *h*, which we indicate by using the italic of that letter. Thus, METTERNICH, *Mét-cr-nih*; LOCHABER, *Lo^h-q̄-ber*; HAMBURG, *Hám-bur^h*.

Next is the trilled *r*, which in French, German, and indeed most of the European languages, is often sounded more roughly, even, than in such English words as *crash*, *terror*, etc., which we indicate by the italic *r*. Thus, LIERRE, *Lé-úr*; PERNAU, *Pér-n^r*.

The Welsh *l*, too, we represent by the italic of that letter, which may be called the whisper of the English vocal *l*, an approximation to which the reader may make by sounding *hl*. Thus, LLANELLY, *Lan-él-ε*.

Lastly, is the sign of the French orinatal vowels, or, as some phoncticians regard it, the whispered *ŋ*. It can only be produced by sounding some vowel through the nose and mouth at the same time, to do which is indicated by affixing the letter *ñ*; thus, MONT BLANC, *Món Bloñ*.

The French *u* or *eu* being very difficult to produce by English mouths, we have not attempted to represent it accurately, but give the nearest English approximation, namely *e* as the vowel in *sir*, or *earth*, which is at least as near the proper sound as "*u* in *tub* or *fur*," which Baldwin gives.

GENERAL PRINCIPLES OF PRONUNCIATION OF THE LEADING EUROPEAN LANGUAGES.

As a guide to the pronunciation of such unimportant names, or names that may hereafter come into sudden notoriety, as are not to be found in this book, we give the following rules, which are more specific, by far, than can be found in any ordinary dictionary. The letters in parentheses, in the Phonetic alphabet, have the sounds referred to immediately preceding.

A.—Always has the sound of *a* in the English word *arm*, (q) in modern Greek, Italian, Norwegian, Polish, Portugese, Spanish, Swedish and usually Welsh. In German it generally has the above sound, but when followed by *h* it frequently has the sound of *a* in *all*, (ø).

In Danish, in addition to the above, it sometimes has the sound of *a* in *at*, (a).

In French, its first sound is like *a* in *arm*, (q); its second like the vowel in *at*, (a), with a circumflex, â, it is sounded very nearly like *a* in *all* (ø).

In Dutch, it is similar to the French.

In Hungarian, it is like *o* in *not*, (o); with an accent, â, like *a* in *arm*, (q).

E.—In Danish is sounded like *i* in *ill*, (i), at the end of an accented syllable; in other situations like *e* in *ell*, (e), or like *ea* in *earth*, (ø).

The Norwegian is similar to the Danish.

In French, marked thus, é, it is sounded like *a* in *ale*, (a); thus, è, like *ea* in *pear*, or *ai* in *air*, (a); thus, ê, like *e* in *very*, (e), and unmarked, like *u* in *up*, (u.)

In Dutch and Flemish, similar to the French.

In German, when long, it is like *a* in *ale* (a); it is, however, more frequently short like *e* in *met*, (e), and sometimes like *ea* in *earth*, (ø).

Swedish, the same as in German.

In Greek, (modern,) it has the sound of *a* in *ale*, (a).

In Hungarian, like *e* in *met*, (e); with an accent, é, more like *i* in *sir*, (ø).

In Italian it has two sounds, like *a* in *ale*, (a), and like *e* in *ell*.

In Polish, without an accent, like *e* in *ell*, (e); with an accent, é, like *a* in *ale*, (a).

In Portugese and Spanish, it is like *a* in *ale*, (a).

In Welsh, like *e* in *met*, (e); when circumflexed, è, like *ai* in *air*, (a).

I.—In Portugese, Spanish and Polish is sounded like *ee* in *eel*, (ε).

In Danish, Dutch, Flemish, French, German, Greek, Hungarian, Italian, Norwegian, Swedish and Welsh, it has two sounds; first, as in *eel*, (ε), second as in *ill*, (i.)

O.—In Danish, Greek, Hungarian, Norwegian, Portugese and Spanish, is sounded as in English.

In French, Dutch, Flemish, German, Italian and Welsh, it has two sounds; first, as *o* in *note*, (ω), and second, as *o* in *rob*, (o).

In Polish, unaccented, like *o* in *note*, (ω), with an accent, like *oo* in *good*, (u).

In Swedish, at the end of a syllable, it is like *oo* in *foot*, (ω); otherwise like *o* in *not*, (o.)

U.—In Danish, Hungarian, Italian, Norwegian, Polish, Portugese and Spanish, is sounded like *oo* in *fool*, (ω).

The French sound of *u* is not heard in English. It seems to be an attempt to pronounce *ee* and *oo* at the same time. We have represented it in this work by the phonetic *ϕ*, which is, perhaps, the nearest approximation to the true sound English mouths can make, without much vocal teaching.

Greek and Dutch are similar to the French.

In German, *u* has two sounds, long like *oo* in *fool*, (ω), short like *u* in *full*, (u).

In Swedish we have represented *u* by the phonetic ω, though this is not the exact sound.

In Welsh, the sound of *u* is like *i* in *ill*, (i), circumflexed, f as *ee* in *eel*, (ε).

F.—In Danish and Swedish, is like the French *u*, (ϕ).

In Dutch and Flemish, like long *i* in English, (i) in *ice*.

In French, German, Hungarian, (when a vowel) Portugese and Spanish, like *ee* in *eel*, (ε).

In Greek, when a consonant and before a vowel or a liquid sound, is like the English *v*; otherwise like *f*.

In Polish, like *i* in *ill*.

In Welsh, in a monosyllable or final syllable, as in *ill*, (i); in the penult or antipenult, like *u* in *up*, when circumflexed, like *ee* in *feet*, (ε).

Aa.—In Danish, sounds like *o* in *ope*, (ω).

Ae.—In Danish and German, like *a* in *ale*, (a).

In Dutch and Flemish, like *a* in *arm*, (a).

Ai.—In French and Greek, like *a* in *ale*, (a).

In German, Spanish and Italian, like *i* in *ice*, (i).

Au.—In French, like *o* in *ope*, (ω).

In German, Italian and Spanish, like *ow* in *owl*, (ɔ).

Ei.—In French, sounds like *a* in *fate*, (a).

In German, like *i* in *ice*, (i).

In Spanish, *ei* and *ey* are pronounced *a-e*.

In Greek, like *ee* in *see*, (ε).

Eu.—In French, is the same as *u*, (ϕ).

In German, it is sounded like *oi* in *oil*, (σ).

Ja.—In French, is pronounced like *ia* in *medial*, (i-a).

Je.—In Danish, Dutch, Flemish, French and German, sounds like *ee* in *see*, (ε).

Oe.—In Danish, German and Hungarian, has no English equivalent; the sound, however, approaches very near the phonetic *ϕ*.

In Dutch and Flemish, it sounds like *oo* in *food*, (ω).

Oi.—In French, is nearly like *wa* in *was*, (wq).

In Greek, like *ee* in *eel*, (ε).

Oo.—In Dutch, is like *o* in *ope*, (ω).

Ou.—In French, is like *oo* in *fool*, (ω).

Ua, ue, ui, wo in French, and *ue* in German, are like the French *u*, (ϕ).

Ui, or uy in Dutch, sound like *oi* in *oil*, (σ).

Ŷo.—In Portugese, are pronounced almost *owng*, (ɔŷ).

☞ Nearly all of the letters in French are silent in different positions.

Most of the consonants are sounded as in English; the following are exceptions:

- B.**—In German, at the beginning of words as in English, but at the end of a word it is pronounced like *p*.
 In Greek it is sounded as *v*.
 In Spanish, between two vowels, it is sounded like *v* modified by *w*.
- C.**—In French, with a cedilla, *ç*, always has the sound of *s*.
 In German, before *e*, *i* and *y*, like *ts*.
 In Hungarian *c* is not used except in connection with some other consonant.
 In Italian, *c* and *cc*, before *a*, *o* and *u*, are sounded as *k*; before *e*, *i* and *y* as *ch*, or *tsʰ*, (*ç*);—*cc* and all double letters, more strongly than single *c*, followed by *e* or *i*, or *i* and another vowel, has the sound of *ch*.
 In Spanish, before *e* and *i*, as *th* in *thin*, (*θ*).
- Ch.**—In French and Portuguese, like *sh* in *shall*, (*ʃ*).
 In German, like a strongly aspirated *h*.
 In Italian, before *e* and *i*, like *k*.
- Cs.**—In Hungarian, is sounded like *ch* in *cheap*, (*ç*).
Cz.—In Hungarian, like *ts*; in Polish like *ch*, (*ç*).
- D.**—In Danish and Spanish, between two vowels, or at the end of a syllable following a vowel, is sounded like *th* in *this*, (*ð*).
- G.**—In Danish, at the end of a word, has the sound of *h*.
 In Dutch, like a strongly aspirated *h*.
 In German, except at the beginning of words, when it is always heard as in *go*, (*g*), it generally has the same sound as in Dutch.
 In Spanish, before *e* and *i*, the same.
 In French, before *e*, *i* and *y*, like *zh*, or *s* in *measure*, (*ʒ*).
- H.**—In German, is only pronounced when it begins a word.
 In Italian it is never sounded.
 In Portuguese it is silent except when following *l* or *n*, when it becomes *y*.
- J.**—In French and Portuguese, is like *zh*, (*ʒ*).
 In Hungarian, like *ee*.
 In Spanish like strongly aspirated *h*.
 In the other languages like consonant *y*.
- Kj.**—In Swedish is sounded as *ch* in English.
- L.**—When it ends a word in French, preceded by *i*, it takes the sound of *y*; or when *ll* follows *i* in any position, the last *l* becomes *y*.
 The same in Spanish.
- N.**—In Spanish, or in Polish with an accent (*ń*), is sounded as *ny*, (consonant).
Q. and *qu*, in French and Portuguese, are sounded as *k*.
 In Spanish, *qu* before *e* and *i* is sounded as *k*, unless *u* be marked with a diæresis, in which case it is *kw*.
- R.**—In Danish, French, German, Hungarian, Italian, Polish, Portuguese, and Spanish, has a stronger trill than in English.
- S.**—In French, between two vowels, has the sound of *z*.
 In German, at the beginning of a word or between two vowels, it is like *z*.
 In Hungarian, like *sh*, (*ʃ*).
 In Polish, with an accent, (*ś*) like *sy* (consonant.)

Sc.—In Italian, before *e* and *i*, is like *sh*, (*f*).

Sch.—In German, is like *sh*, (*f*).

Sz.—In Hungarian, is like *s*.

In Polish, like *sh*, (*f*).

Th.—In German, is pronounced like *t*.

Te, and *ty* in Hungarian, are like *ch* in English, (*ç*).

V.—In German, except when between two vowels, has the sound of English *f*.

W.—In Danish, Dutch and German, is sounded very nearly like English *v*, except that the upper teeth should not touch the lower lip.

X.—In French, sometimes has the sound of *s* or *z*.

In Portugese, like *sh*, (*f*).

In Spanish, like the strongly aspirated *h*.

Z.—In German, is sounded as *ts*.

In Polish, like *zh*, (*z*).

In Italian, like *dz*.

Zs.—In Hungarian, is like *zh*, (*z*).

Zz.—In Italian, is like *ts*.

ACCENT.—The French language cannot be said to have any accent, yet there is seemingly a stress of the voice on the last syllable in a word, and when any accent has been given in this work, it is on the last syllable. Great care should be taken, however, in not making so great a difference as in English, but to pronounce each syllable with such a force as will let each glide smoothly into that which follows it.

No rule can be given for the accent of the German words. And the same may be said of the Hungarian, yet with this difference, while the German names have a distinct accent, the Hungarian are distinguished by *quantity*. In Italian, Spanish and Portugese, words ending in a vowel are accented on the penult; Spanish words ending in a consonant are accented on the last syllable. Polish words or names of more than one syllable are always accented on the penult. Russian words are always accented on the last syllable. Welsh words are always accented either on the penult or the last syllable.

Of course, in the preparation of a work of this kind at the present day, there can be but little originality, and we have to acknowledge our indebtedness to most of the Gazetteers that have heretofore been published, not having relied exclusively upon any one.

The compiler also acknowledges valuable aid received from Mr. William Henry Smith, especially in the preparation of the list of Personal Names, to obtain the pronunciation of which was often attended with considerable investigation and trouble.

Conscious that there may be some blunders and inaccuracies in the pages thus prepared, for we have found many such in the most carefully compiled books we have consulted, we commend our labors to the leniency of those who may seek to be benefited by them, with the request that they will assist us in making them more perfect, by forwarding to the publishers a note of such errors as they may discover.

CONTRACTIONS EMPLOYED IN THIS WORK.

As a general thing the contractions will suggest the reading intended. The populations of towns, cities and islands, are represented by figures and fractions that give the number of thousands; thus, $5\frac{1}{2}$ immediately following any such name is to be read 5,500; but if a fraction only, then the population is only that portion of a thousand. In the sentence, "*l, can and t Switz., 7 $\frac{1}{2}$,*" and similar ones, the figures apply only to the place last mentioned.

PRONOUNCING

GEOGRAPHICAL VOCABULARY.

- Aa, A-q, or A; contraction of old German *Aaha*; *rs* in Ger., Neth., Fr.
- Aach, *Ah*, *t* and *r* Bad.
- Aachen, *Ah'en*, See *Aix-la-Chapelle*.
- Aagard, *O'gqrd*, *v* Den.
- Aal, *Ol* or *Øl*, *t* Nor.
- Aalborg, *Ol'borg*, *c* Den., 7½.
- Aalesund, *Øle-sónd*, *t* Nor.
- Aalst, *Ast*, *v* Neth., *t* Belg.
- Aar, *Ar*, *r* Swit., *rs* G.
- Aarnu, *A'rs*, *t* Swit., 4¾.
- Aarberg, *Ar'berg*, *t* Swit.
- Aargau, *Ar'gs*, [Fr. Argovie, *Ar-gwé*,] *can* Swit.
- Aarhus, *Or'hæs*, *s-pt* *t* Den., 8.

- United States, Yj-njt-ed Stats, Rep. N. Am., occupying more than half of the territory of the North Temperate Zone, and presenting in the unity of its States, the most perfect government the world ever witnessed. The face of the country is of every variety—valley, mountain, and plain. Topographically considered, the United States are divided as follows: 1. The Atlantic, or Alleghany Slope; 2. The Mississippi Valley; 3. The Pacific, or Rocky Mountain Slope. The first, the oldest, and comprising the original states of the confederacy, possessing the greatest number of inhabitants, farthest advanced in the arts and sciences, commercial and educational improvements, steadily furnishes the states and territories of the other two divisions with "bone, sinew" and mind, for their settlements. The second comprises the richest and most extensive agricultural country in the world; while the other,

yet in embryo, contains beneath its hills great mineral wealth, and in its mountain streams undreamed of manufacturing power.

States and Territories.	Area in s. ms.	Total populat'n.
Maine,	31,766	583,169
New Hampshire,	9,280	317,976

Utah Ter.,	299,170	11,380
Oregon Ter.,	185,030	13,294
Washington Ter.	123,022
Total,	2,936,166	23,191,876

The rapidity with which population increases in the United States is remarkable: at the rate of increase for the preceding ten years, up to 1850, the present population would be (1856) 28,753,062. The number of persons to the square mile in the non-slaveholding states were 21.91; slaveholding, 11.35.

The educational system is unequal-

led by that of any country (excepting Prussia) in the world. The number of public and private schools, colleges and academies, is 87,162; of students in attendance 4,089,597, and the proportion at school is 1 to 4.9, not including slaves, and greater than that of any other country. The ratio of those over twenty years of age unable to read or write is 1 in 40 in the non-slaveholding states, and 1 in 12 in the slaveholding states. In the New England states, 1 in 400. The number of papers published, 2,526; while other publications, such as books, pamphlets, etc., exceed, probably, all other countries together.

American ships are found on every sea, and in its ports the productions of every clime are received. There entered from foreign ports, in 1854, 19,103 vessels, with a tonnage of 5,884,339 tons; cleared, in the same period, 19,073, with a tonnage of 6,019,194; value of imports, \$304,562,384; exports, \$278,241,064.

PERSONAL NAMES.

INTRODUCTION.

SURNAMES, like Steam Engines, Railroads, and Telegraphs, seem to be of modern origin, the expanse of mind and a rapidly advancing civilization having created the necessity for a definite distinction between the actors in the drama of life. However this may be, the invention seems, to the mass of mankind, to be more perplexing than those mentioned in this connection; but this difficulty is not, let it be borne in mind, in the names *vocally* expressed, but in their *symbolical* representation. Following out the tendencies of a wretchedly imperfect orthography, the good fathers dressed themselves [*i. e.*, their names,] in ill-arranged costumes, which, after the established manner of things temporal, fell to their children, who have since continued to hand them down from generation to generation, with but slight modifications.

If it be true that, "*Sine nomine homo non est,*"* then should the clothing of the name be appropriate—an indication to the eye of what the *thing* is itself. But alas! such is not the case, and in view of the fact, which we cannot look to be changed at present, in any way whatever, we have endeavored, in the pages that follow, to overcome this difficulty to some extent—to place it in the power of the reader to call people by their *right names*. We do not claim for it correctness in *every particular*, for the many difficulties in the way rendered this impossible at first, but we feel confident that the reader of general history, and the student in all the departments of science and literature, will find this list of PERSONAL NAMES an invaluable companion. And, furthermore, to those engaged in commercial, mechanical, or agricultural pursuits, who generally give their spare time each day to the reading of their "paper," this will be found of great use in rendering familiar what they read. The constant intercommunication between the civilized nations of the earth, the numerous travelers following the various directions of the compass, at the present time, render such a work highly important. There are biographical dictionaries, it is true, but while the names given are barely readable to the *savant*, they are unapproachable barriers in the way of the general reader.—Surely this class, as well as

* Without a name man is nothing.

all others who are in the habit of reading, will feel grateful for the appearance of this little work, and all other attempts to make intelligible words clothed in a strange orthography. If every Dutchman one meets has not a name so long as *Hans Inkvervankodsorepanckinkadrachlern*,—or every father of the Church so modest a title as that of "*St. Collen-ap-Gyunawy-ap-Clyndawg-ap-Cowrda-ap-Caradoc-Freichfras-ap-Llynn-Merim-ap-Enion-Yrth-ap-Cunedda-Wledig*,"* still there are many less imposing, of Anglo-Saxon as well as of foreign races, quite unpronounceable without assistance,—to dress these in phototypy renders them intelligible.

This, as we believe, is the first attempt to give the pronunciation of modern names, and in the absence of such a work of reference the task has been laborious. But no pains have been spared in procuring the correct pronunciation of every name as far as possible, not only as instanced, but by reference to geographical names, poetry, and to works in every department of science and Belles-lettres. For instance, the name of a distinguished Senator from Texas, (Houston,) is pronounced by some public speakers, Hús-ton, by others, Hós-ton; now the object to be obtained was to find out how the gentleman pronounced it himself, which was done, and was found to be as last given. It would have been gratifying to the publishers to have been able to give a more extended notice of the works of the great minds that have passed away, together with those actively engaged at the present time,—to have chatted column after column away about the SHAKESPEARES, NEWTONS and GODWINS, the GÆTHES, KANTS and SCHILLERS, the LA PLACES and FRANKLINS of the past, the HUMBOLDS, ARAGOS and AGASSIZ, of the present, but this would have alone required a massive volume, and would have defeated the object of the publishers, which was to make a convenient book of reference for every class of persons.

In conclusion, we invoke an honest criticism of our labors, hoping that such errors as are noted will be forwarded in time to make the requisite corrections in the second edition.

W. H. S.

*The dedication of the Church of Llangollen in Wales. [Vide *Recreative Review*, vol. ii. p. 189, Eng.] It appears from the following laughable description of cheese, designed to ridicule this system of nomenclature, that the surnominal adjunct, *ap*, [meaning *of*, or *from*, by descent,] was used in Wales until recently:—

"Adam's own cousin-german by its birth,
Ap-Curds-ap-Milk-ap-Cow-ap-Grass-ap-Earth!"

English Surnames, vol. i. p. 18.

EXPLANATION OF ABBREVIATIONS.

The usual Geographical abbreviations are employed, as explained in the Introduction to the Geographical Names; also, the ordinary abbreviations of Christian names. In order to economize space, an abridged style of expression has been adopted, which when once understood is sufficiently expressive for a book of reference. Thus: "Aaron, *eld br* Moses,"—*elder brother of Moses*; "b. A. M.,"—*born year of the world*; "B. C.,"—*before Christ*. The figures at the close of each paragraph, thus: "1512—1571," are to be read, "born 1512—died 1571;" or if "k." precede the last figures, read "killed 1571;" "g." "guillotined," &c. See "Ainmuller," "1807—," means, born 1807, but not dead, or if so it is not known; "Allen," "—1789," means, the birth is not known, but died in 1789. [Those who own the book, when they hear of the death of any individual mentioned in it, should enter the time of his decease opposite the name.]

<i>act</i> actor.	<i>emp</i> emperor, empire	<i>na</i> national.
<i>adm</i> admiral.	<i>eng</i> engineer.	<i>nat</i> naturalist.

PERSONAL NAMES

OF

DISTINGUISHED INDIVIDUALS.

- Aaron, A'ron, *eld br* Moses, first high priest of the Jews, b. A. M., 2434, or 1575 B. C.
- Aartsbergen, Alex. Van, Fon Arts'bergen, *nob* and *st* of Holl., 17th cen.
- Abati, Nicolo, Nik-ó-ló A-bá-te, *pt* Italy, 1512—1571.
- Abbas Pacha, Ab'qs Pá-sq, *vic* Egypt.
- Abbot, Ab'ot, Samuel, *merch* Boston, Mass., 1732—1812. [*aus* Mass.]
- Abbott, Ab'ot, John S. C. and Jacob, *off* Scot., 1734—1801.
- Abd-El-Kader, Obd-cl-Ká-der, *gen* Algeria. [*au* Eng.]
- A'Beckett, A-Bék-et, Gilbert Abbott, Abererombie, Ab-er-kró-m-bi, John, M. D., *au* and *ph* Scot., 1781—1844.
- Abereromby, Ab-er-kró-m-bi, Sir Ralph, *off* Scot., 1734—1801.
- Aberdeen, Ab-er-dén, Geo. Gordon, Earl of, *st* Eng.
- Abernethy, Ab'er-ne-ti, John, *sur* and *au* Ir., 1763—1831.
- Abinger, Ab'in-ger, James Scarlett, Lord, *j* Eng., 1769—1844. [*Chaldea*.]
- Abraham, A'bra-ham, patriarch, b. in
- Achilles, A-kil ez, *fab*, being dipped by his mother in the river Styx, was invulnerable in every part except his right heel, by which she held him; killed at the siege of Troy.
- Achilli, Giovanni Giacinto, Jǝ-vá-ne Jǝ-gén-tǝ A-ké-ǝ, Italian Church reformer.
- Actæon, Ak'te-on, *fab*, a hunter who, discovering Diana bathing, was by her turned into a stag.
- Adam, Ad'am, father of the human race, lived 930 years after his expulsion from Paradise.
- Adams, Ad'amz, C. B., *geo* and *au* Mass., 1814—1853.
- Adams, John, *st*, V-Pres. to Washington, from 1789—to 1793, and Pres. U. S., till 1801; Mass., 1735—1826. V-Pres., Thomas Jefferson.
- Adams, John Quincy, son of Pres. John Adams, *st* and sixth Pres. of U. S., from 1825 to 1829, elected by House of Representatives, 1767—1848. V-Pres., J. C. Calhoun. [1722—1803.]
- Adams, Samuel, Am. *pat* and *st* Mass., Adams, J. C., *astr* Eng.
- Adanson, A-dán-son, Michel, *bot* and *au* Fr., 1727—1806.
- Addison, Ad'i-son, Joseph, *poet* and *au* Eng., *ed* "Spectator," 1672—1719.
- Adelung, A'de-lǝn, John Ch., *philol* Ger., 1734—1806.
- Adolphus, A-dól-fus, Frederick II, & Sweden, 1710—1771.
- Adonis, A-dó-nis, a youth remarkably beautiful, beloved by Venus and Proserpine.
- Æneas, E-né-as, Trojan prince, son of Anchises and Venus, —1197 B. C.
- Æolus, E'ǝ-lus, the god of the winds.
- Æschines, Es'ki-nez, *or* cotem. Demosthenes, 730 B. C. [B. C.]
- Æschylus, Es'ki-lus, *poet* Athens, 274
- Æsculapius, Es-ku-lá-pi-us, the god of physic.
- Æsop, E'sop, a Greek slave, *au* of the fables that bear his name, 200 B. C.
- Agamemnon, Ag-a-mém-non, brother to Menelaus, captain-general of the Greeks at the siege of Troy.
- Agassiz, Louis, Lǝ-i Ag-ǝ-se, *dist. nat*, born 1807, in Switzerland, now of Mass. [1747—1822.]
- Aikin, A'kin, John, M. D., *wr* Eng.
- Ainmuller, A'n'mul-er, Maximilian Emanuel, *art* Ger., 1807 —

- Ainsworth, ʔnz'wurt, W. Harrison, *nov* Eng., 1805—
- Ainsworth, ʔnz'wurt, *comp* English and Latin Dictionary, 1743—
- Airy, ʔr'i, Geo. Bidell, *ast royal* Eng., 1798—
- Ajax, ʔ'jaks, *fab*, one of the princes and heroes at the siege of Troy.
- Akensido, ʔ'ken-sjd, Mark, *poet* and *ph* Eng., 1721—1770.
- Alban, ʔl'ban, St., first Christian martyr in Britain, 3d cen.
- Albert, ʔl'bert, Franz-August-Karl-Emanuel, Prince Consort, Duke of Saxo-Coburg-Gotha, but better known as "Prince Albert," Eng., 1819—
- Aleibiades, ʔl-si-bj-a-dez, Athenian *gen*, slain 404 B. C.
- Alembert, ʔ-lém-ber, John Le Rond d', *math*, died 1783.
- Alexander the Great, son of Philip, k Macedon, born 365 B. C. At 20 assumed his father's throne, and at 33 had "conquered the world," and died.
- Alexander Paulowitch, ʔl-eks-án-der Pó-ló-wič, *emp* Rus., 1777—1825.
- Alexander II, present *emp* Russia.
- Alfieri, ʔl-fi-á-re, Count Vittorio, *dramatic poet* It., 1749—1803.
- Ali, Pacha, Pá-jq ʔ'lj, *prince* Eu. Tur., 1750—1822.
- Alison, ʔl'i-son, Archibald, *hist, adv* and *au* Scot., 1792— [Scot.]
- Alison, Wm. Pultney, *pol econ* and *ph*
- Allen, Ethan, ʔ'tan ʔ'en, *off* Am. army, —1789. [—1626.]
- Alleyn, ʔl'jn, Edward, *act* Eng., 1566
- Allston, ʔl'ston, Washington, *pt* Mass., 1779—1843.
- Almqvist, ʔlm-kó-ist, Karl Jonas Ludwig, *au* Sweden, 1793—
- Alsop, ʔl'sop, Richard, *poet* Conn., 1759—1815.
- Alva, ʔl'vq, Ferdinand, duke of Alva, *gen* Sp., 1508—1582.

PRONUNCIATION

OF

SCRIPTURE PROPER NAMES.

Aalar, A'a-lar.	Abidah, A-bj-da.	Accad, Ak'ad.
Aaron, A'ron.	Abidan, Ab'i-dan.	Accaron, Ak'a-ron.
Ab, Ab.	Abiel, A'bi-el.	Accho, Ak'ō.
Ahacue, Ab'a-ku.	Abiezer, A-bi-é-zer.	Accos, Ak'os.
Ahadah, Ah'a-dq.	Abiezrite, A-bi-éz-rit.	Accoz, Ak'oz.
Abaddon, A-bád-on.	Abigal, Ab'i-gal.	Aceldama, A-sél-da-mq.
Abadias, Ab-a-dj-as.	Abihail, Ab-i-há-il.	Achab, A'kab.
Abagtha, A-bág-ta.	Abihu, A-bj-hu.	Achad, A'kad.
Abal, A'bal.	Abihud, A-bj-hud.	Achaia, A-ká-ya.
Abana, Ab'a-nq.	Abijah, A-bj-ja.	Achaicus, A-ká-i-kus.
Abarim, Ab'a-rim.	Abijam, A-bj-jam.	Achan, A'kan.
Abaron, Ab'a-ron.	Abilene, Ab-i-lé-ne.	Achar, A'kar.
Abba, Ab'a.	Abimael, A-bim-a-el.	Achaz, A'kaz.
Abda, Ab'da.	Abimelech, A-bim-é-lek.	Achbor, Ak'bör.
Abdi, Ab dj.	Abinadab, A-bin-a-dab.	Achiacharus, A-ki-ák-a-
Abdias, Ab-dj-as.	Abinoam, A-bin-ō-am.	rus.
Abdiel, Ab'di-el.	Abiram, A-bj-ram.	Achim, A'kim.
Abdon, Ab'don.	Abiram, A-bj-rom.	Achimelech, A-kim-é-lek.
Abednego, A-béd-ne-gō.	Abisai, A-bis-a-j.	Achior, A'ki-ör.
Abel, A'bel.	Abisei, Ab-i-sé-i.	Achiram, A-kj-ram.
Abel Bethmaacah, A'bi	Abishag, Ab'i-fag.	Achish, A'kij.
Beth-má-a-kq.	Abishahar, A-bij-a-hqr.	Achitob, Ak'i-tob, <i>or</i>
Abel Maim, A'bel Má-im.	Abishai, A-bij-a-j.	Achitub, Ak'i-tub.
Abel Meholath, A'bel Me-	Abishalam, Ab-ij-a-lam, <i>or</i>	Achitophel, A-kit-ō-fel.
hó-laθ. [ra-im.	Abishalom, Ab-i-já-lom.	Achmetha, Ak'mé-tq, <i>or</i>
Abel Mizraim, A'bel Miz-	Abishua, A-bij-ū-q, <i>or</i>	Ak-mé-ta.
Abel Shittim, A'bel Sit-	A-bj-fū-q.	Achor, A'ker.
im.	Abishur, Ah'i-fur.	Achsa, Ak'sa.
Abesan, Ab'é-san.	Abisum, Ab'i-sum.	Achshaph, Ak'faf.
Abesar, Ab'é-sar.	Abital, Ab'i-tal.	Achzib, Ak'zib.
Abez, A'bez.	Abitub, Ab'l-tub.	Acipha, As'i-fq.
Abgarus, Ab'ga-rus.	Abiud, A-bj-ud.	Acitho, As'i-tō.
Abi, A'bj.	Abner, Ab'ner.	Acua, A-kū-a.
Abia, A-bj-a, <i>or</i>	Abram, A'bram, <i>or</i>	Acub, A'kub.
Abiah, A-bj-a.	Abraham, A'bra-ham.	Ada, A'da.
Abialbon, A-bi-ál-bon.	Absalom, Ab'sa-lom	Adad, A'dad.
Abiasaph, A-bj-a-saf.	Abubus, A-bū-bus.	Adada, Ad'a-dq.
Abiathar, A-bj-a-tqr.	Acaron, Ak'a-ron.	Adadah, Ad'a-dq.
Abib, A'bib.	Acatan, Ak'a-tan.	Adadazer, Ad-ad-é-zer.

Adadrimmon, Ad-ad-rim-on.	Agabus, Ag'a-bus.	Al, El'j.
Adah, E'da.	Agag, E'gag.	Aiah, E-j-a.
Adaiah, Ad-a-j-a.	Agagite, E'gag-jt.	Aiath, E-j-ad.
Adalia, Ad-a-lj-a.	Agar, E'gar.	Aija, E-j-ja.
Adam, Ad'am.	Agarenes, Ag-a-rénz.	Aijah, E-j-ja.
Adama, Ad'a-mq, or	Agee, Ag'e-e.	Aijalon, Aj'a-lon.

Advantages of Phonography.

PHONOGRAPHY has been defined as a philosophical method of writing the English language, with an alphabet composed of the simplest geometrical signs, which accurately represent the sounds of spoken words. It may be written six times as fast as the ordinary longhand, and is equally legible. Aside from the scientific propriety of the system, as made manifest in the Introduction which follows, the following practical advantages are worthy of consideration:

1. To professors of scientific and literary institutions—to gentlemen of the bench or the bar—to legislators in the halls of representation—to ministers of religion—to lecturers on the various arts and sciences—it presents the most invaluable aid, in enabling them to arrange, condense, and fix their thoughts, facts, arguments and proofs, in the briefest period of *time* and the shortest possible *space*, presenting, in the condensed schedule of a *small page*, a full and complete synopsis of their most elaborate speeches, orations, or discourses.

2. By its aid, the advocates in the courts of justice or the halls of trial, will be enabled to write, with ease and accuracy, either the full depositions of important witnesses, or the facts, proofs, evidences, and arguments of legal opponents, and thus be in a position, not only to meet them with readiness and strength, but eventually to thoroughly overthrow and refute them.

3. The student in the halls of science can transcribe with faithfulness, and preserve in the smallest compass, the valuable lessons of professors, and thus preserve, for the meditation of his leisure hours, a *connected whole*, instead of broken, detached, and uncertain fragments, that often serve to confuse, bewilder, or perplex.

4. Merchants, and clerks of mercantile houses, to whom *time* and *space* are really a desideratum, will find Phonography a most invaluable auxiliary; as the ease with which it can

be learned and acquired, and the facility and readiness with which it can be *written* and *read*, will enable them to transcribe their accounts, to note their memoranda, to post up their bills, and even to conduct their correspondence, in less than *one-fifth* of the ordinary time, and in a considerable reduction of the ordinary space; and as "time is *money*," it presents to them indeed a most invaluable gain.

5. To the author, editor, or general writer—to the orator, legislator, or minister—how invaluable must it be, when they reflect how many of their most brilliant thoughts and most glowing conceptions, how many of the most sparkling gems of their imaginations and the most radiant pearls of their thoughts, that in moments of *genius* and enthusiasm flash like electric sparks from the mind, are *forever* lost for the want of some *Daguerrean* process, like the one we present, to catch and transfix them *on the wing*, recording them on the glowing page in *all* the freshness, vigor, and brilliancy of their first conception, as rapidly as they are presented to the mind! and for the lack of which, alas! like the dazzling flash of the evanescent meteor, they fade and expire as rapidly as they are kindled, and leave but the indistinct memory of their trace behind.

6. A practical acquaintance with this art is highly favorable to the improvement of the mind, invigorating all its faculties, and drawing forth all its resources. The close attention requisite in following the voice of the speaker (in reporting) induces habits of patience, perseverance and watchfulness, which will gradually extend, till they form habits that will be found useful through life. The close attention to the words and thoughts of the speaker which is necessary in writing them down, will naturally have a tendency to endue the mind with quickness of apprehension and distinctness of perception, whereby the judgment will be strengthened and the taste refined.

7. The memory is also improved by the practice of Phonography. The necessity for the writer to retain in his

mind the last sentence of the speaker, while he is attending at the same time to what follows, and also to penning down his words, must be highly beneficial to that faculty, which is more than any other improved by exercise. It draws out and improves all the faculties of the mind.

“Phonography,” says Messrs. FOWLERS & WELLS, “we regard as one of the most important inventions of the age, and one which should be open to every person desirous of being considered educated. As a system of reporting, general correspondence, and memoranda, it is unparalleled in usefulness. In chirography, it is what the telegraphs are in agencies for transmitting thought. We employ three reporters, one in our office and two who travel with lecturers from our house. In *ten minutes* we can dictate an article for publication which we could not compose and write in two hours; besides it contains more spirit and freshness than if labored through at the slow pace of ordinary composition. Every scholar should by all means learn it.”

Professor HART, Principal of the Philadelphia High School, says: “Phonography has been introduced into this institution two years and a half, and has been learned by about four hundred. Two hundred are studying it now. It is one of the regular branches of the course, being attended to three times a week during the whole of the first year. Had I not supposed it to be of much practical value, I should not have urged its introduction, a measure which I have seen no occasion to regret. Such of our students as have made Phonographic Reporting a profession, have got along in life faster, by all odds, than those in any other kind of business, and that without the possession of any special brilliancy of talents. Some of them, not yet turned twenty, are now making more money by Phonographic Reporting than the Principal of the High School, after having given himself for more than twenty years to his profession.”

Said the Hon. Thomas Benton: “Had this art been known forty years ago, it would have saved me twenty years of hard labor.”

“It is my humble opinion that it will eventually supersede the present system of writing, as the steam carriage train supersedes the old eight inch wheeled wagon.”—*Rev. Dunbar.*

Such are the tendencies of the art this book is designed to unfold.

AMERICAN
MANUAL
 OF
Phonography.

LONGLEY BROTHERS, Publishers,
 No. 160 Vine Street, Cincinnati, O.

TEN years' experience in the Phonographic art, as Teacher and Reporter, and for nearly the same period occupied, more or less, in preparing books for the press, give the author of the AMERICAN MANUAL OF PHONOGRAPHY the fullest assurance in presenting this work to the public. Since its first publication, it has undergone careful revision, and now appears in an entirely new dress, in every way adapted to the wants of the teacher and private learner. It differs from any other work published, in the following particulars:

1. The explanatory matter is in large, clear type.
2. The Phonographic Exercises are engraved in a bold, distinct style, that they may be as easily read by candlelight as daylight.
3. The Reading and Writing Exercises are introduced just where the text requires them, whether it be on the same page or the opposite one.
4. The Exercises to be written are printed in phonetic spelling, which, being fully explained, enables the learner to analyze accurately, and vocalize his writing correctly—two essentials to rapid progress and the attainment of a good style.
5. Each lesson is closed with a review in the form of questions, which, as in all other text books on science, proves of great service to both learner and teacher.
6. It contains more extensive lists of Contracted Words, and more Phraseography than any other work.
7. Beside the above characteristic features, the AMERICAN MANUAL possesses all the late improvements in Phonography, including the adaptation of the art to the writing of foreign languages.
8. The AMERICAN MANUAL is one-fourth larger than works of the kind usually are, more space being devoted to an exposition of the philosophy of the system, for the purpose of satisfying the student in regard to the necessity of the various contractions, etc. It is printed on the very best of paper, and is substantially and elegantly bound.

PRICES:—Single copies, in paper covers, 40 cts.; postage 4 cts.
 " in boards, 45 cts.; " 8 cts.
 " in cloth, 50 cts.; " 8 cts.
 " in black sheep, 75 cts.; " 8 cts.

Three to 10 copies at one-fourth less; 12 to 20 at one-third less.

Phonetic Publications.

Published and Sold by Longley Brothers, Cincinnati, O.

THE SPELLING REFORM—Instituted to make universal education possible, by rendering the arts of Reading and Writing pleasant and easy to acquire. PHONOTYPY is a rational system of spelling words as they are pronounced, by employing an enlarged alphabet containing a separate letter for each sound, by which means the drudgery of learning to spell is entirely dispensed with, and learning to read is accomplished in one-fourth of the time required in the old way. PHONOGRAPHY is a truly philosophical method of writing the English Language, by an alphabet composed of the simplest geometrical signs, which accurately represent the sounds of spoken words. It may be written six times as fast as ordinary longhand, and is equally legible, and such is the simplicity of the art that its principles may be easily mastered even without the aid of a teacher.

The first price is that charged at the counter; the second includes the prepayment of postage; a liberal reduction by the quantity.

Phonotypic Works.

Chart of the Phonotypic Alphabet, on a sheet 28 by 42 inches, with a Key,	25—25
The same, 36 by 50, with explanatory matter, and remarks on the acquisition of Good Reading,	50—54
The same, on canvas and roller,	1,50
Phonetic Primer, each letter illustrated with a letter suggestive of its sound,	5—6
First Phonetic Reader, containing simple and interesting reading lessons,	10—14
Second Phonetic Reader, containing lessons of a more advanced grade.	20—25
The Transition Reader, or a Course of Inductive Romanic Reading Lessons. For the use of Phonetic Readers in learning to read Romanically,	20—25
Biographies of the Presidents, with their Portraits. In paper covers, 80—85; in cloth, gilt lettering,	40—48
New Testament, 12mo. edition, according to the authorized version. In cloth, 75—90; dark sheep, 85—1,00; morocco, gilt,	\$1,25—1,40
Money-Getting and Money-Spending; a Prize Essay of twenty-four chapters; a serious and reformatory work. In paper, 25—30; cloth,	40—46
Phonetic Dictionary of the English Language; a complete work of 800 octavo pages, embracing also lists of Classical, Geographical and Scriptural Names.	\$3,50—4,00
Pronouncing Medical Lexicon, the definitions in the common spelling. An invaluable companion to Medical Students, readers of physiological and hygienic works. Cloth, 75—85; sheep, 85—1,00	
Phonetic Almanac, and Register of the Spelling and Writing Reform, together with a list of the American Phonetic Society, for the years 1852, 1853, 1854, 1855 and 1856.	10

Phonetic Longhand Writer; exhibiting various styles of Penmanship,	10—11
Longhand Alphabet, in slips, to be used as a key by enclosing in letters written in phonetic longhand. Per dozen,	6—7
School Credit Tickets.—A handsome and useful form of Credit Tickets, in Phonetic dress. The Ticket is adapted for Primary and District Schools. Per hundred,	40
Type of the Times; a journal of the Writing and Spelling Reform. Printed in the new orthography. Semi-monthly. Per year, in advance,	\$1,00
The Youth's Friend; an elegant monthly paper, devoted to the improvement of the young. Embellished with Portraits and Historical Illustrations, partly in the phonetic orthography. 50 cents a year; three copies, \$1,00; ten copies, \$3,00; twenty copies, \$5,00	

Phonographic Works.

First Lesson in Phonography; Containing the Alphabet and a simple reading lesson. Useful for lecturers to distribute in an audience, &c. 1 ct. Per hundred,	50—60
American Manual of Phonography; being a complete exposition of Phonetic Shorthand, especially arranged so as to give the fullest instruction to those who have not the assistance of the oral teacher. In paper, 40—42; cloth,	50—58
<p><i>This instruction book is just published, and differs from any other work of the kind in this important particular: It thoroughly explains the Phonotypic or new printing alphabet, and its exercises for writing are printed phonetically, which enables the pupil to progress more correctly and rapidly than if printed in the ordinary orthography.</i></p>	

BENN PITMAN'S PHONOGRAPHIC PUBLICATIONS.

Manual of Phonography, 50—57, extra cloth,	60—67
Phonographic Reader, engraved exercises,	25
Cruise of the Tomtit; Second Reader, ditto,	25
Manners Book, corresponding style, do.	75—81
Teacher, a Treatise on Lecturing and Teaching Phonography,	1,00—1,07
Copy Slips, a series of Phonographic exercises,	10—11
Phonographer's Song, richly illustrated,	25—27
Phon. Mag., for 1854, '55, '56, per vol,	1,25—1,36
Phonographic Chart, in colors,	75—1,00
Reporter's Companion; the adaptation of Phon. to verbatim reporting,	75—81, cloth, 1,00—1,07
History of Shorthand, reporting style,	75—81
Manners Book, in easy reporting,	75—81
Phon. Reporter for 1854, '55, '56, per vol,	1,25—1,36
